zanotta:

LKVM STUDIO was founded in the city of Hangzhou in 2014 by artists and photographers Lekui and Vincent Marsolais, and established itself in Montreal in late 2020. It is first and foremost a partnership rooted in a common artistic and philosophical vision, one which explores the place of naturality within the aesthetics of our lives and the transcendental individuality of the objects that inhabit the spaces we share. Together, they've cumulated over 18 years of experience in general photography, interior design and fine-arts. Using only natural light, they aim to bring to life the essential qualities of intricate works of design in masterful ways.

Throughout the last decade, they've had the honor and privilege of working with prestigious designer brands such as Gervasoni, Carl Hansen & Søn, Zanotta, Ethnicraft, Original BTC, District Eight, Maruni, Case and many more.

While their work has remained focused on furniture and interiors, this specialization has only acted as an anchor to their insatiable curiosity. Besides the dozens of portraits, lifestyle and fashion assignments, they've found an eagerness in bringing to life what only the imagination can conceive; this is notably materialized by their several abstract photography exhibitions, photopoetry books and collections of acrylic paintings, many of which are featured along high-end furniture brands.

Ultimately, this diversity in practice and know-how only adds to the organicity and originality of their art. Working with light, camera, furniture and accessories as well as a deep-rooted staging and compositional knowledge, their pictures highlight the textures, shapes and purpose craftsmanship has to offer, providing visual inspiration for home-designers and creators alike. Every element added or removed is carefully pondered in its weight and significance. Drawing inspiration from Eastern philosophies and following Northern European trends, their mot d'ordre remains harmony - with their subject, with their clientèle and with nature.

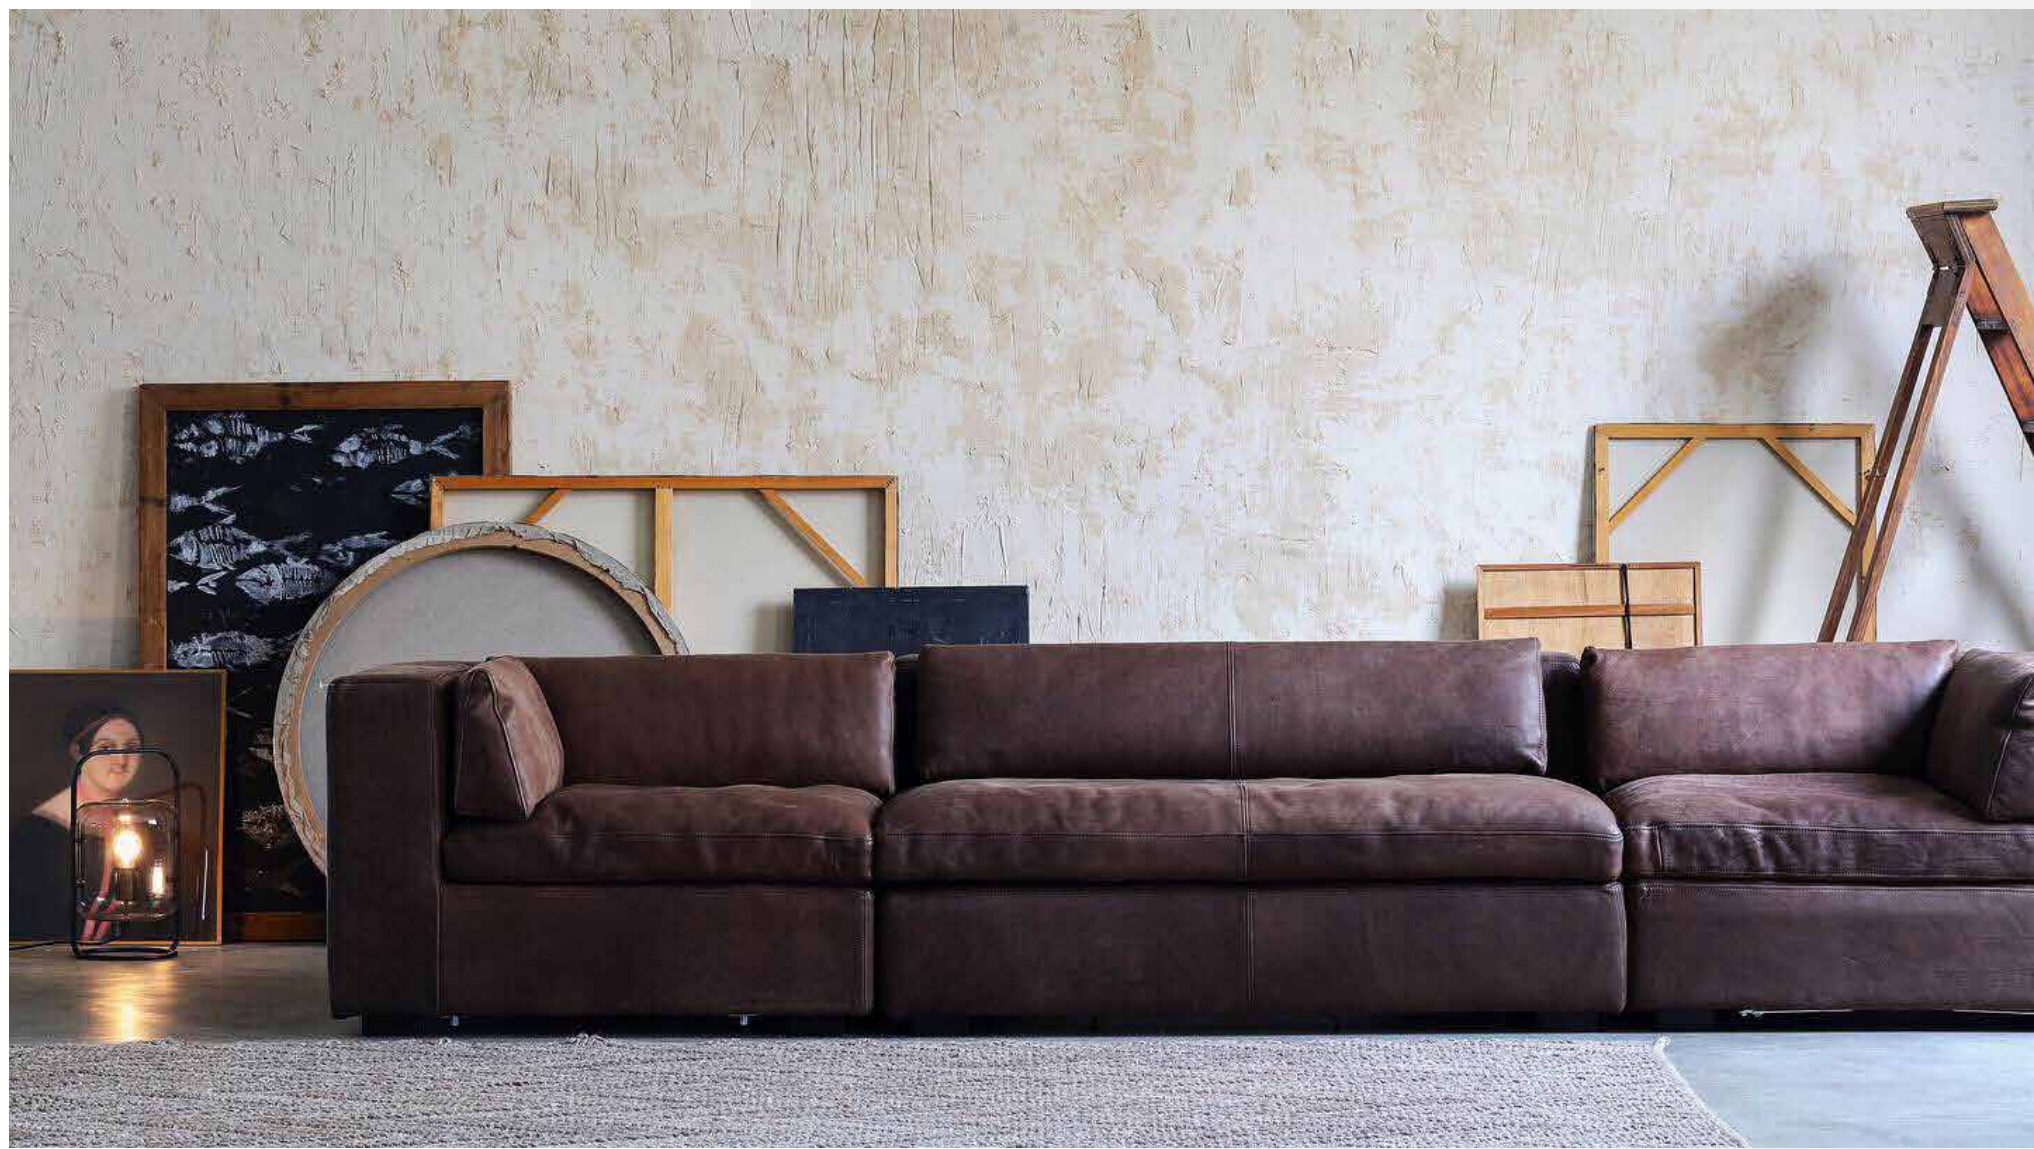

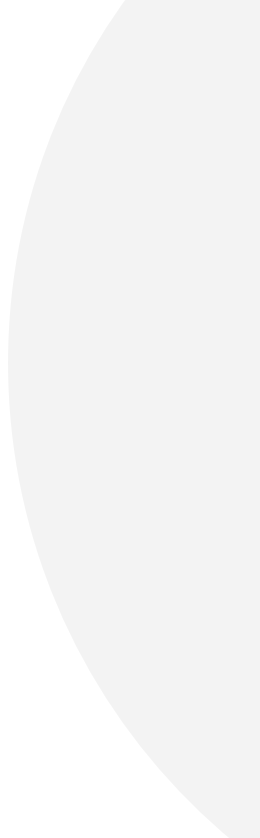

TYPE IS
ONE OF THE
GRAPHIC
ELEMENTS
THAT
DESIGNERS
ALWAYS GET
ADDICTED TO
PLAY WITH.

LEKUI

As a photographer, home-staging designer and artist, it seems that Lekui has always had an absolute eye. Her natural ability to make sense of complex compositions, intuitively adopting the perspective of any given camera lens, has been the most powerful asset in all of the studio's projects. Her academic background in design combined with her many years as a stage photographer, as well as the important role she has occupied at high-end furniture company Norhor for over a decade, all provided her with invaluable expertise in her field. With her colorful and carefree personality, few can resist her friendliness. After all, she believes that the mood in which one works ultimately determines the quality of the outcome; great achievements must involve laughs and pleasure one way or another.

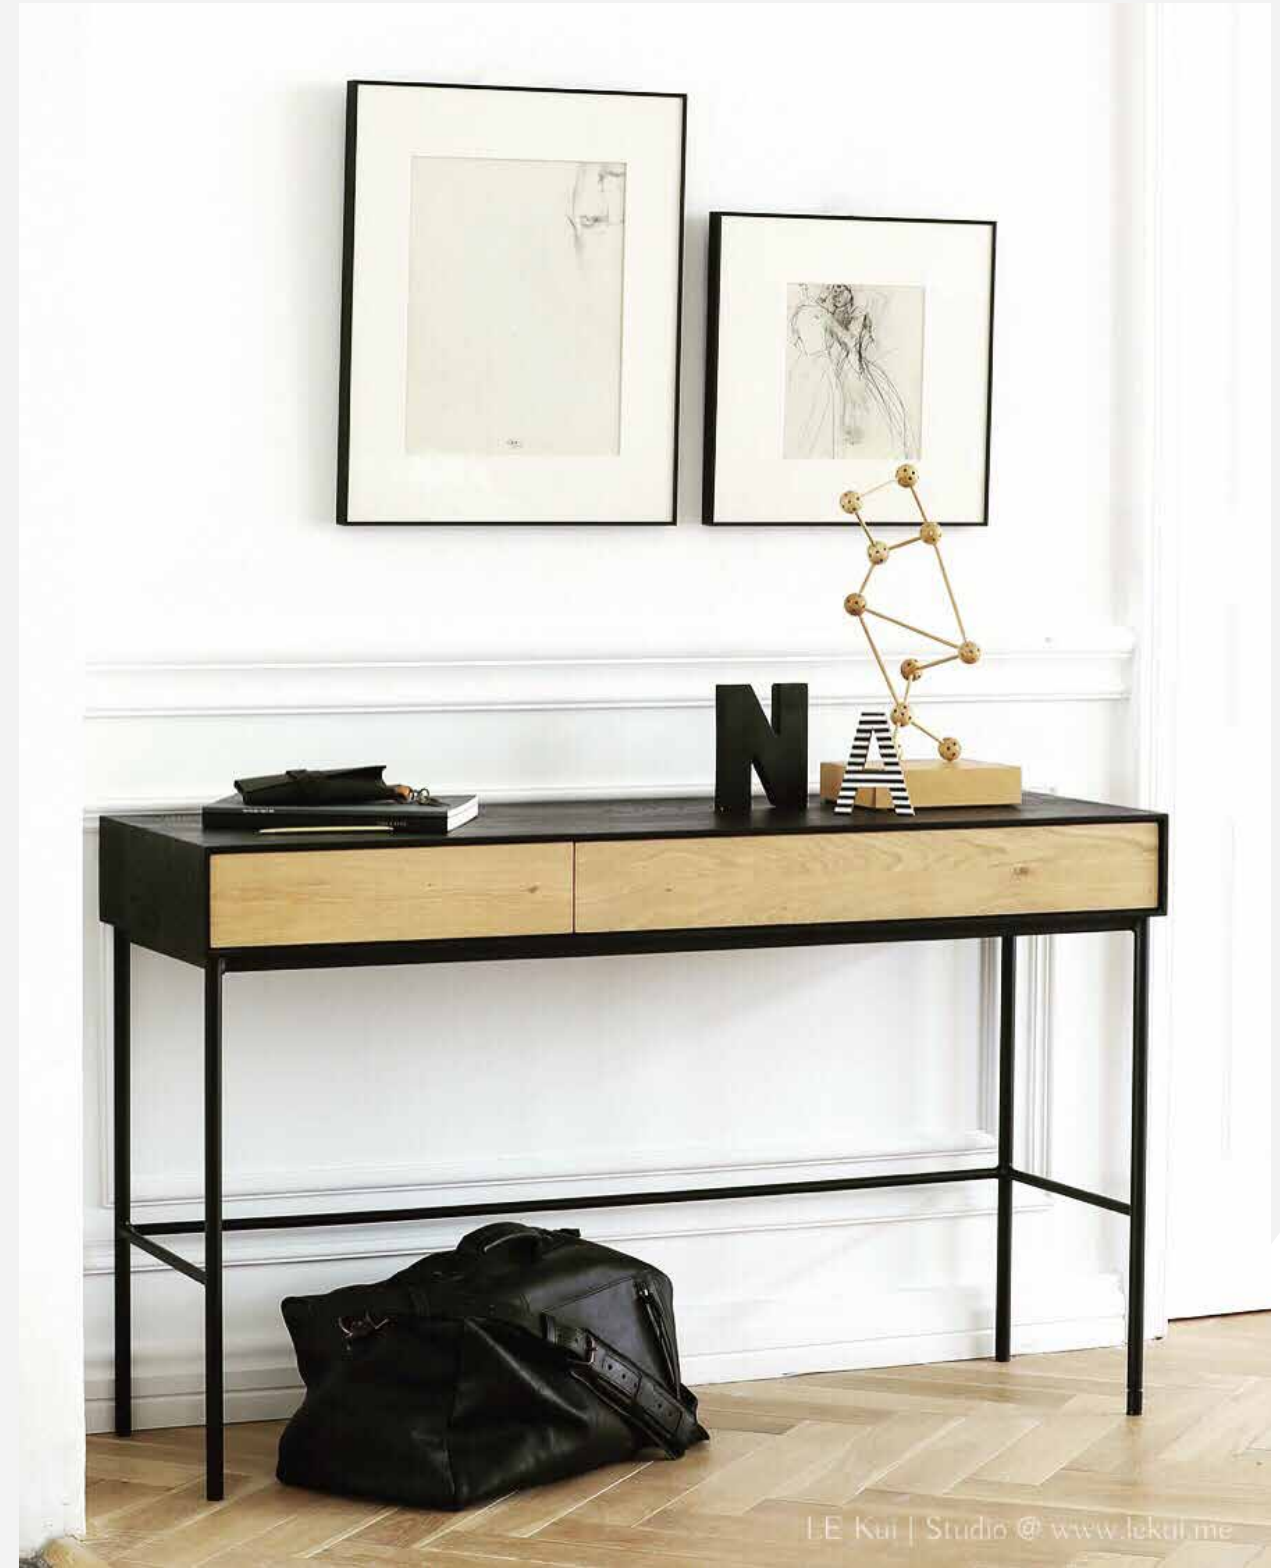

V. MARSOLAIS

With a strong background in computer sciences and a wide technical knowledge in multimedia, Vincent has always been involved in the visual arts, providing valuable editing skills in post-production, a unique creative output as well as his filming and photography skills during photoshoots. With a personality that's keen on experimenting and pushing boundaries, the camera represents for him a limitless means of exploration. As also a writer in French and English, he has put into words and stories a multitude of photographs for interior and location assignments. No matter the subject involved, he believes that every nuance of life deserves a spotlight of its own and is always eager to explore new ways of highlighting beauty in the world.
